LinkedIn: https://www.linkedin.com/in/brooks-rosenberg-b8376a142/

I am a recent college graduate from Boston University with a B.A. in Economics and a full-stack developer trained by the Columbia Engineering Coding Boot Camp

Projects

The Oracle Project | Columbia Engineering Coding Boot Camp Course
UX Engineer

- This project was to develop a daily horoscope and random fact generator
- This project was accomplished by using HTML, CSS, and JavaScript, along with using browser-based technologies like JQuery and Bootstrap to work with public APIs to generate horoscope data and random facts data from two APIs. As UX Engineer I was in charge of ensuring functionality of data fetch functions and managing return functions to generate data for users.

Day Planner | Columbia Engineering Coding Boot Camp Course
Head Engineer

- The purpose of this project was to create a day planner for the 9-5 work day
- This project was accomplished using HTML, CSS, and JavaScript to create a day planner that used local storage to allow for users to create, save, and manage a day planner for the work day. I achieved this by using Moment.Js to create a dynamic day planner that lets you know the current hour and of any events the user has saved.

Horiseon Refactor | Columbia Engineering Coding Boot Camp Course
Head Engineer

- The purpose of this project was to refactor code have semantic elements instead of non-semantic elements
- This project was by refactoring the HTML by removing div tags and exchanging them for semantic elements along with adding accessibility features such as alt tags. This was the introductory project to the bootcamp.

EDUCATION

Boston University College of Arts and Sciences,Boston, MA	May 2021
